RULES UPDATES
This document contains **rules updates** and **frequently asked questions** for Warhammer Underworlds. Rules updates improve game balance, enhance clarity and correct any errors, while frequently asked questions explain how the rules are intended to be used. This document is updated regularly.

VERSIONS
Updates to digital files are identified by a **version number** that can be found on their respective downloads. The version number is found next to the warband name on updated warscroll cards and in the bottom-left corner of updated fighter cards.

New versions always take precedence over earlier versions. If a card does not include a version number, it is version 1.0. You can download the most up-to-date versions of these digital files from warhammer-community.com.

CORE RULES (v1.3)

RULES UPDATES
The following rules updates improve game balance, enhance clarity and correct any errors.

WEAPONS (Printed pg 8, Digital pg 4)
Change the second and third paragraphs to:
'Weapons with the �֎ runemark are **melee weapons**. Attacks made with melee weapons are **melee Attacks**.

Weapons with the ⤳ runemark are **ranged weapons**. Attacks made with ranged weapons are **ranged Attacks**.'

4. PLACE TREASURE TOKENS (Printed pg 11, Digital pg 7)
Change to:
'The player who did not pick their territory shuffles the feature tokens with the numbered side face down. Following the restrictions below, players then place their feature tokens as follows:
The player who did not pick their territory places 1 feature token numbered side down in an empty hex. ~~The other player then places 1 feature token numbered side down in an empty hex in neutral territory.~~ Then, players alternate placing feature tokens numbered side down in empty hexes.

RESTRICTIONS
♦ Feature tokens cannot be placed in starting hexes, blocked hexes, stagger hexes, edge hexes or within 2 hexes of another feature token.
♦ If it is otherwise impossible to place a feature token, it can be placed in an edge hex.
♦ After 5 feature tokens have been placed, there must be a minimum of 1 feature token in each player's territory.

Once 5 feature tokens have been placed, flip them to reveal their numbered side. Feature tokens displaying their numbered side are **treasure tokens**.'

THE UNDERDOG (Printed pg 12, Digital pg 8)
Change to:
'If one player's slain friendly fighters have a greater combined Bounty characteristic than their opponent's, that player is the underdog. Otherwise, there is no underdog. Certain abilities can only be used if a player is the underdog.'

DRIVE BACK (Printed pg 16, Digital pg 12)
Change to:
'If the number of successes in an Attack roll is equal to or greater than the number of successes in the Save roll, and there are any successes in that Attack roll, the attacker's player can use the following ability:'

PERSISTING ABILITIES (Printed pg 22, Digital pg 17)
Add the following bullet point:
'Abilities found on warscroll cards and Plot cards persist for the duration of the game, unless specified otherwise.'

NEMESIS DECK BUILDING (Printed pg 23 only)
Change the first bullet point to:
♦ Pick 2 different Rivals decks. ~~Only one Rivals deck with a Plot card (pg 20) can be picked to be one of your chosen decks.~~

FREQUENTLY ASKED QUESTIONS
In this series of questions and answers, the rules-writing team respond to players' queries and explain how the rules are intended to be used.

ABILITIES
Q: *The Core Rules state that 'An Action step ends after the chosen Core ability is resolved'. What happens if a player uses a Surge ability that allows a friendly fighter to Attack again after a failed Attack? Does this new Attack happen in the same Action step or after it?*
A: That second Attack is part of a Surge ability and is resolved after the Action step.

Q: *Can you explain how 'Sequencing Abilities' and 'Playing Surge Abilities' interact with each other?*
A: These rules explain how abilities that can be played at the same time are played and then subsequently resolved. If both players have multiple Surge abilities that can be played at the same time, the players take it in turns to play their abilities one at a time until both players pass. Then, the player whose turn it is resolves all of their own Surge abilities first, then their opponent does the same.

Q: What happens when multiple Surge abilities have been played and any of those abilities can no longer be resolved due to a change in the game's state?
A: If the ability's conditions can no longer be met, the ability has no effect but it still counts as having been used.

Q: If a card has more than one ability on it (e.g. 'Ominous Rumbling') but only one of those abilities can be resolved due to the game's state, can I still play that card?
A: Yes.

Q: If an ability says 'Use this in a Power step' but does not give a specific timing, when can I use that ability?
A: When it is your turn to do so in that Power step – see 'Power Step' in the Core Rules.

Q: Can I play a card that requires a specific condition (like two fighters being adjacent) when that condition is not part of the current game state, even if a Surge effect that would resolve before that card would create the required condition? For instance, can I play 'Confusion' when there are no fighters adjacent but the effect of 'Canny Sapper' would make two fighters adjacent?
A: No.

Q: Can I use abilities with the timing 'after a Core ability' after the Move or Attack parts of a Charge?
A: No. A Charge is defined as a single Core ability that contains a Move and an Attack. Although Move and Attack are each Core abilities when used independently, they are the Charge Core ability when used together.

'BUT MY CARD SAYS…'
Q: Does the 'But my card says…' section of the Warhammer Underworlds rulebook apply to abilities on a warband's warscroll card?
A: Yes.

Q: If an ability on a card or warscroll card says a fighter can use a Core ability (e.g. 'That fighter immediately Moves/Attacks/Charges etc.), can a fighter with a Charge token use that ability even if there are other friendly fighters that don't have Charge tokens?
A: Yes.

DETERMINE WHO TAKES FIRST TURN
Q: When determining which player takes the first turn, which player (the player referred to as 'the other player') draws 1 Power card?
A: The player who lost the roll-off.

INFLICTING DAMAGE
Q: If a Surge Ploy or Surge Ability gives an Attack 'Grievous' and the modified Damage of that weapon is enough to slay the target, who dealt the damage?
A: The attacker.

Q: Can damage inflicted on a fighter be reduced to 0?
A: No, unless an ability states otherwise.

Q: Can fighters be allocated more damage points than their Health characteristic?
A: Yes. There is no limit to how many damage points can be allocated to a fighter beyond their Health characteristic.

BOUNTY
Q: For the purposes of Objective cards that count the Bounty value of slain fighters, do Raised fighters revert to their printed Bounty characteristic if they are slain again?
A: Yes.

PLAYING PLOYS
Q: Can you define when a Ploy card has been 'played'?
A: A Ploy card is played when it is revealed.

DELVE
Q: If a fighter cannot be given Stagger tokens (through a card effect or warscroll ability), can that fighter Delve?
A: No.

SURGE OBJECTIVE CARDS
Q: If the same player has a Surge Objective card and a Surge ability that both have the same timing, what order are they resolved in?
A: That player decides.

TREASURE TOKENS
Q: Can a player check the value of a face-down treasure token at any time?
A: Yes, except during the 'Setting Up' sequence.

NEMESIS
Q: When playing Nemesis format, what should be revealed at the start of the game?
A: Your warband and your two Rivals decks.
